

Innovated for Point-Of-Care

myvet CT D

VETERINARY DENTAL CT SYSTEM

Acquire High Quality CT Images in Specific Area

Streamlining Diagnostics at the Point of Care

High-Quality Precise Imaging at a Lower Cost

SITE-SPECIFIC DIAGNOSTIC CAPABILITIES

High-Resolution CT Scanning for Dental, Extremities and Exotic Cases

MyVet CT D incorporates CMOS technology, enabling specific area scanning that is well-suited for dentistry, extremities, and exotic animals. The integration of a CMOS sensor further enhances the clarity and detail of the captured images with a high-resolution slice thickness of 0.1mm, facilitating accurate diagnosis and treatment planning.

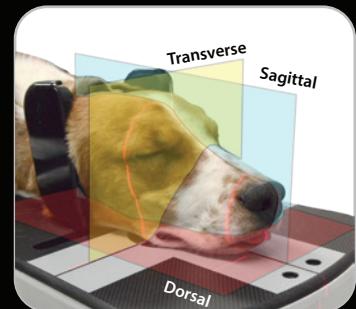

- Diagnose tooth root abscesses where x-ray is inconclusive
- Evaluate oral tumors located deep within tissues of the mouth or throat
- Evaluate complex fracture and joint abnormalities of the extremities
- Advanced imaging for exotic animals

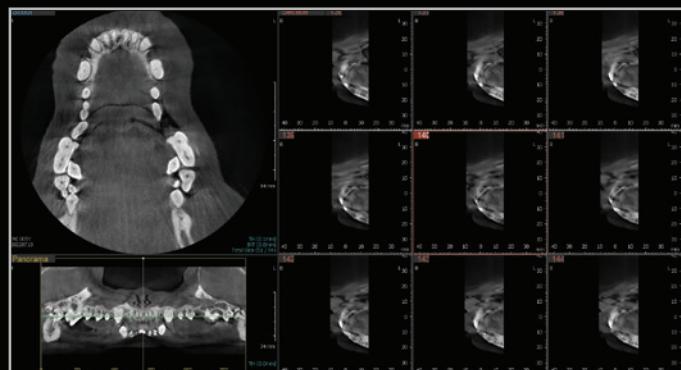

PRECISE AND ACCURATE DIAGNOSIS

Powerful 3D Visualization and Tools

The software offers advanced features that allow for precise localization of specific parts within the 3D volume image, facilitating exploration of the area using slice images through the utilization of the 3D explore tool. It also offers distortion-free Multiplanar Reconstruction (MPR), ensuring accurate and precise visualization of anatomical structures in alternative planes.

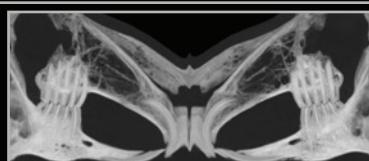

- Small animal dental specific preset technique
- Enlarge the diagnosis area by stitching multiple parts
- Isolate a specific pulp area and obtain detail results by endodontic visualization tool
- Select a specific area of interest from the 3D volume image and explore the area with slice images to the spot using 3D explore tool

POINT-OF-CARE MOBILE SCANNING

Easy, Quick and Accurate Patient Positioning

MyVet CT D features a space-efficient and integrated design with a touch screen monitor, fast scanning capabilities, and mobility for convenient scanning near treatment or surgical sites. It also includes a table bed, laser beam guide for positioning, and an optional extension table for patient comfort and precise imaging. Streamlining the diagnostic process allows for immediate and efficient imaging at the point of care.

COST-EFFECTIVE PRECISION IMAGING

Advanced Diagnostics with Energy Efficiency and Reduced Expenses

MyVet CTD offers a cost-effective solution compared to other CT systems, while still providing advanced diagnostic outcomes for site-specific examinations. In addition to its affordability, this system presents advantages such as lower operational costs, reduced maintenance requirements, and energy efficiency, delivering significant benefits to veterinary practices.

SPECIFICATIONS

| Item | Description |
|---------------------------------------|---|
| Weight | 308.6 Lbs (140 Kg) |
| Dimensions | 64 x 38.39 x 66 (Max.) in (1627 x 975 x 1676 mm) |
| Radius of rotator rotation | 16.97 in (431 mm) |
| Extension bed (Option) (L x W x H) | 19.77 x 21.42 x 0.28 in (502 x 544 x 7 mm) |

| Item | Specification |
|----------------------|-------------------|
| Line Voltage (Input) | 120 - 240 Vac |
| Power rating | 1.6 kVA |
| Installation type | Integrated system |
